

**Description :**

This option is suitable for manual leadscrew table Type 309\* in size 3 and size 4 (models 309 L/M/N/P/R/S). It allows the handwheel to be oriented at 90° in relation to the axis of the table to facilitate access if it's restricted. It's also possible to use the transmission alone (without operating element) to connect 2 tables with a hexagonal bar.  
=> réf : /RA7000

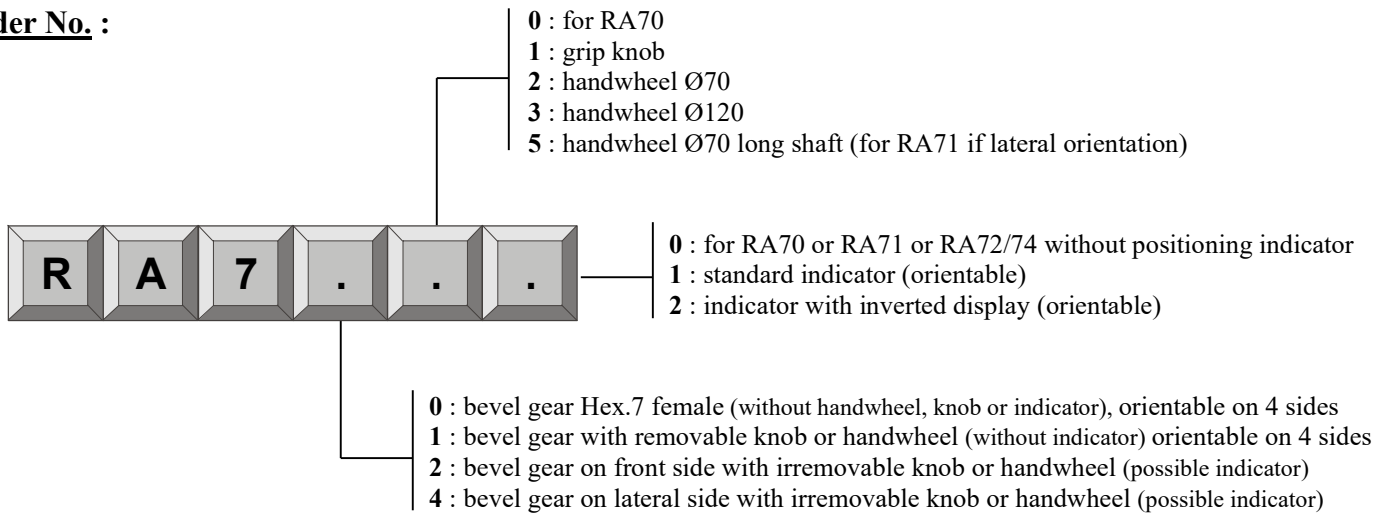

To allow mounting of the bevel gearbox on tables 309\*3 and 309\*4, the tables must be with a 7 mm hexagonal shaft output (with the suffix /SAX7 after the order no.).

Different possibilities are offered to meet different uses :

- Orientation towards the front side or the lateral side
- With removable or irremovable handwheel (or grip knob)
- With (or without) positioning indicator, rotatable at 0°, 90° or 180° and 2 viewing directions

Maxi driving torque : 4 Nm / Gear ratio 1:1
